

THE EYE DROP LABEL

Last Updated: Tuesday, 3 February 2009

Author: Karen Stancliffe

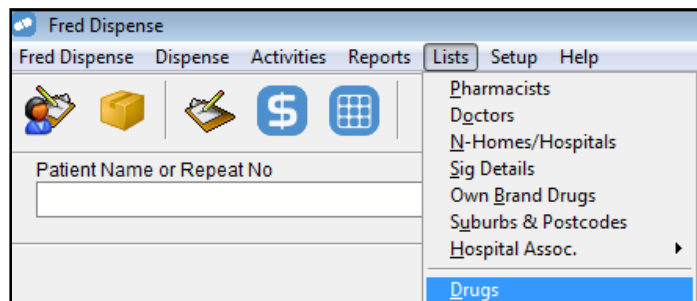

Summary 1
 Details 1

Summary

Eye drop containers are much smaller than most medication packaging. Often the main label is too big to fit on the bottle. The Fred5 label format allows for a special eye drop label to be printed for use on eye drop medication. The label can also be configured to print for other types of medication.

Details

The setting for label size is found in the menu - Lists > Drugs as shown below.

The label size can be set to S for small or L for Large. By default all eye drop medications are set to S for small. This means an eye drop label will print for any eye drop medication automatically.

 A screenshot of the Fred Dispense software interface showing the 'Drugs' form for XALACOM. The form contains various fields for drug information, including Name, Form, Strength, Code, Pack, Generic, Pack Size, NHS Gen Link, Diff, Subst, Wholesale \$, Our Wholesale \$, Supplier Code, PDE Number, PDE No 2, APN, Aus Reg No., Stock Group, Drug Ranking, Warnings, and Formulary. The 'Label Size' field is highlighted with an orange box and set to 'S'.

Drug Code	NHS Type	Date From	Drug NHS Code	Authority	Max Qty	Max Rpts	Clear Days	SNQ
LATA2	R	01/04/2006	4300H		1	99		
LATA2	R	01/08/2002	4300H		1	5		
LATA2	N	01/04/2006	8895E		1	5	04	N

To set the label size to S for small for another medication –

- Click on the Lists menu and choose Drugs
- Press F for Find and type in the name of the item you are searching for
