

LABEL PRINTING OPTIONS

Overview

In Fred Dispense, the Label printer tab on the Fred Dispense Configuration window lets you specify the pharmacy information (e.g. name, approval number, address, phone no.) printed on your dispense labels. The settings on this tab are commonly used if a pharmacy is not using pre-printed labels.

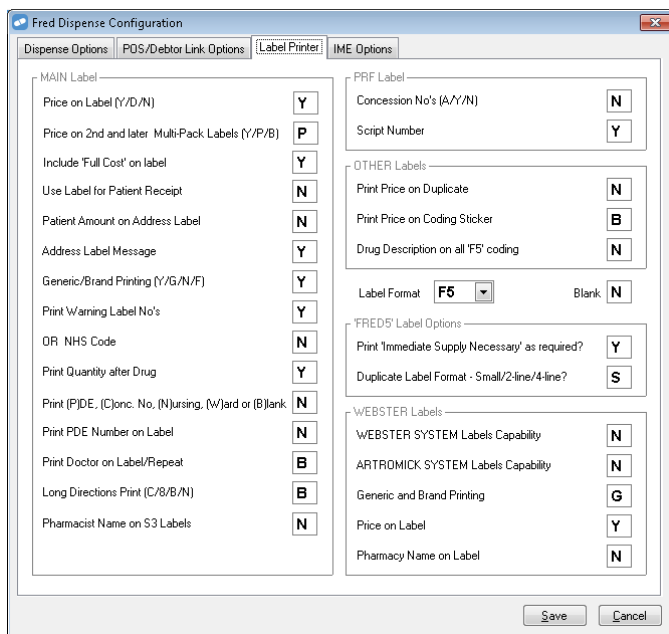

Access the label printing options

To access the Label Printing Options:

1. In Fred Dispense, select the Setup menu, and then select Dispense Options.

2. Select the Label Printer tab.

Note: For information on setting up blank labels, see the next page.

Label printing options for blank labels

There are four different letters you can enter in the **Blank** text box.

The screenshot shows the 'Fred Dispense Configuration' window with the 'Label Printer' tab selected. The 'Label Format' dropdown is set to 'F5'. The 'Blank' checkbox is checked and highlighted with a red box. Other options include 'Price on Label (Y/D/N)' set to 'Y', 'Concession No's (A/Y/N)' set to 'N', and 'Script Number' set to 'Y'.

Y = Yes Completely. Use this if your labels start off completely blank and require Fred Dispense to print all of the pharmacy information onto the label.

This label shows the 'Y' option. It includes pharmacy information: 'Fred IT Group Pharmacy, Fred IT Group - Ph: (03)94181800'. Medication details: 'SALMETEROL XINAFOATE ACCUHALER 50mcg 60d 1'. Instructions: 'Inhale TWO doses by mouth TWICE a day'. Patient information: 'DAPHNE JONES 05/03/12 Dr L SMIBERT 2382 BC 5 Rpts \$5.80'. Barcode and price: '\$5.80'. Date: '05/03/12 8141L 80401P \$5.80'.

C = Coding. Use this if the coding sticker is blank and Fred Dispense needs to print the approval number on the coding sticker.

This label shows the 'C' option. It includes a coding sticker area: 'Immediate Supply Necessary 05/03/12 2382 BC'. Medication details: 'SALMETEROL XINAFOATE ACCUHALER 50mcg 60d 1'. Instructions: 'Inhale TWO doses by mouth TWICE a day'. Patient information: 'DAPHNE JONES 05/03/12 Dr L SMIBERT 2382 BC 5 Rpts \$5.80'. Barcode and price: '\$5.80'. Date: '05/03/12 8141L 80401P \$5.80'.

L = Label. Use this if your labels have the pharmacy information pre-printed on the small duplicate, the main label, and the long L label at the bottom.

This label shows the 'L' option. It includes pharmacy information: 'Fred IT Group Pharmacy, Fred IT Group - Ph: (03)94181800'. Medication details: 'SALMETEROL XINAFOATE ACCUHALER 50mcg 60d 1'. Instructions: 'Inhale TWO doses by mouth TWICE a day'. Patient information: 'DAPHNE JONES 05/03/12 Dr L SMIBERT 2382 BC 5 Rpts \$5.80'. Barcode and price: '\$5.80'. Date: '05/03/12 8141L 80401P \$5.80'.

N = Nothing Blank. Use this if your labels are fully pre-printed with the pharmacy information and do not require any pharmacy information to be printed by Fred Dispense.

This label shows the 'N' option. It includes pharmacy information: 'Fred IT Group Pharmacy, Fred IT Group - Ph: (03)94181800'. Medication details: 'SALMETEROL XINAFOATE ACCUHALER 50mcg 60d 1'. Instructions: 'Inhale TWO doses by mouth TWICE a day'. Patient information: 'DAPHNE JONES 05/03/12 Dr L SMIBERT 2382 BC 5 Rpts \$5.80'. Barcode and price: '\$5.80'. Date: '05/03/12 8141L 80401P \$5.80'.
