WHAT'S NEW IN FRED OFFICE 3.6?

This release comes with the following new features:

- Tester Item identifier
- Item Lookup (Fred Mobility)
- Print multiple label templates at once

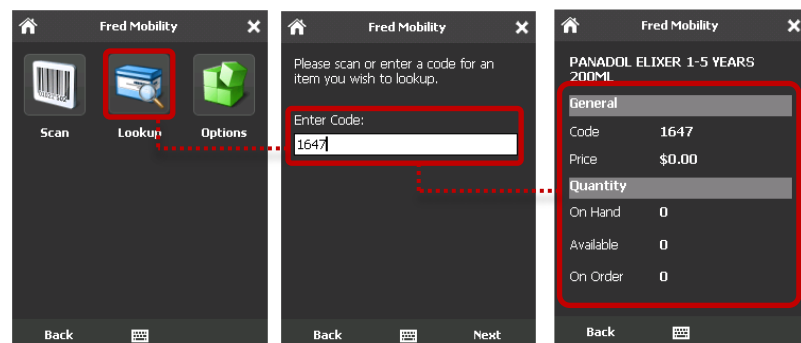

Tester Item identifier (item cards)

Items can now be marked as "Tester Items" from the item stockcard *General* tab. This marks the item as non-inventory and restricts the item to one order quantity per order.

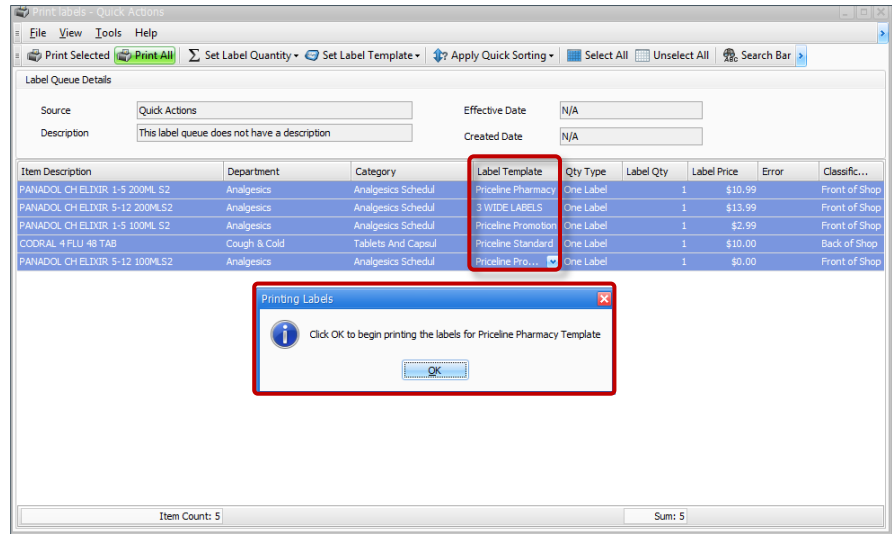

Item Lookup (Fred Mobility)

Item Lookup allows you to view the *Code*, *Description*, *Price*, *Quantity On Hand (QOH)*, *Quantity Available*, and *Quantity On Order* when using the *General* options section of your Fred Mobility device.

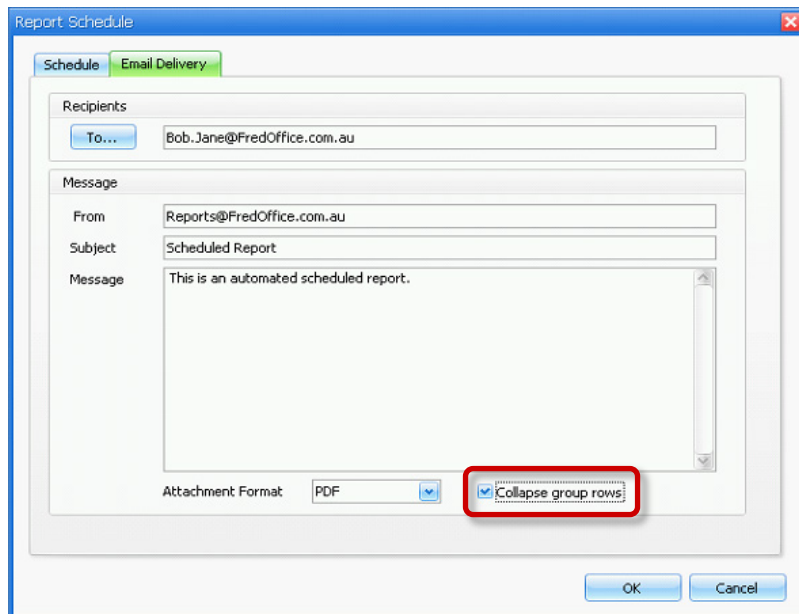

Print multiple label templates at once

You can now print all label templates within the *Label Queue Print Labels* screen. The print order, grouped by template, alerts you before each new template is printed, giving you the opportunity to change labels at the printer.

Email Scheduled reports showing expanded/collapsed rows

Scheduled reports can now be emailed with the option to display grouped rows expanded or collapsed.

WHAT' S FIXED IN FRED OFFICE 3.6?

This release comes with the following general fixes and improvements:

- **Stock Valuation Historic report.** The *Cost Ex* and *SOH \$* values will no longer round to the nearest dollar.
- **Store-to-Store transfers.** Timeout issues have been fixed so that duplicate items will no longer occur during store-to-store transfers.
- **Transfer Out invoice (Discount and Surcharge columns).** These columns will now persist in *Column Chooser* when removed from grid view.
- **Fred SatScan Stock on Hand (SOH).** Addresses an issue that caused Fred SatScan to incorrectly set the SOH when pressing F4.
- **PharmX invoices.** Addresses an issue that caused PharmX invoice retrieval issues to and from Fred Office.
- **Out of Stock list.** Correct items will now display in the Out Of Stock list.
- **Temporary Items.** Fixes an issue where new items could not be created or matched from *Temporary Items* within an invoice.
